## PRESS RELEASE

### BRABUS **800** 4x4<sup>2</sup> STEALTH GREEN

#### Luxury off-roader with 588kW / 800hp twin-turbo V8 and exclusive BRABUS high-end equipment

Outstanding off-road capabilities, uncompromising performance on the waters, and an ideal combination of design and precision on your wrist: BRABUS has long been more than solely a manufacturer of supercars and the world's largest independent automotive refinement specialist. With its Marine Division, the German company also offers unrivalled high-performance boats and moreover designs exclusive wristwatches in cooperation with luxury watch manufactory Panerai.

Now BRABUS (Brabus-Allee, D-46240 Bottrop, phone +49 / (0) 2041 / 777-0, Internet [www.brabus.com](http://www.brabus.com)) is offering a new, fascinating trio in Stealth Green!

The BRABUS **800** 4x4<sup>2</sup> STEALTH GREEN is created based on the Mercedes-AMG G 63 4x4<sup>2</sup> and mesmerizes not only with its spectacular BRABUS ADVENTURE design with exposed-carbon elements, winch, roof rack and 22-inch forged wheels with all-terrain tires, but also with its centerpiece, the eight-cylinder engine with an uprated output of 588 kW / 800 hp (789 bhp) and a peak torque of 1,000 Nm (737 lb-ft). It accelerates the supercar with extreme off-road capabilities to 100 km/h (62 mph) in a scant 4.6 seconds. Due to the high center of gravity and the all-terrain tires, the top speed is electronically limited to 210 km/h (130 mph). The occupants are welcomed in the luxurious ambience of an exclusive "BRABUS Sunrise" BRABUS MASTERPIECE interior crafted from fine leather and carbon.

The off-road supercar is also available as part of the select BRABUS STEALTH GREEN EXCLUSIVITY Package, which in addition comprises an equally extraordinary super boat and a strictly limited watch. It sells for 1,400,000 euros (export price in Germany excluding statutory VAT).

The BRABUS Shadow **900** STEALTH GREEN Signature Edition sports boat is painted the same color as the off-roader. Combined, its two outboard motors actually produce 900 horsepower, which give the 38ft (approx. 11.6 meters) boat a top speed north of 60 knots (about 111 km/h or 69 mph).

As with the BRABUS **800** 4x4<sup>2</sup> STEALTH GREEN, the super boat, which BRABUS

# BRABUS

## PRESS RELEASE

Marine developed in cooperation with Finnish high-end boat builder Axopar, its cushions and pads sport the “BRABUS Sunrise” color.

The perfect complement to the two exclusive vehicles is the select Panerai Submersible S BRABUS Verde Militare Edition dive watch. It combines thrilling design with maximum robustness and precision thanks to the use of hi-tech materials and the ultimate in the art of precision mechanics.

### BRABUS **800** 4x4<sup>2</sup> STEALTH GREEN

In addition to high performance, the developers' specifications for this BRABUS supercar with “Stealth Green” paintwork listed maximum off-road capabilities at the very top. For this reason the engineers and designers of the high-end luxury manufactory from Bottrop chose the limited-edition Mercedes-AMG G 63 4x4<sup>2</sup> with portal axles as the perfect basis for the **BRABUS 800 4x4<sup>2</sup> STEALTH GREEN**.

This special axle design gives this G-Class model tremendous capabilities in tough off-road use, because this design enables significantly greater axle articulation compared to a standard G 63 with its conventional chassis. This results in further enhanced off-road qualities.

Tailor-made BRABUS Monoblock HD wheels were developed specifically for the eight-lug bolt pattern of these axles. Thanks to the use of hi-tech forging and machining technology, these wheels are also perfectly steeled for the hardest off-road missions. The wheels of size 9.5Jx22 carry all-terrain tires of size 325/55 R 22 front and back. They perfectly fill out the space under the fender flares, which were enhanced with BRABUS exposed-carbon extensions. The “Stealth Green” brake calipers are visible between the eight spokes of the rims, which were painted glossy black for this supercar.

The heavy-duty off-road concept at the front is characterized by the BRABUS fascia with integrated exposed-carbon skid plate, LED side markers, and the winch with a line pull of 4,500 kilograms (9,900 lbs.). In addition, there is a carbon radiator grille with integrated BRABUS logo and “Stealth Green” signature stripes. The BRABUS “Powerdome” is also made from carbon with high-gloss sealed finish and thus adds another striking touch.

In addition, the bodywork refit includes the carbon BRABUS wind deflector above the windshield, whose integrated LED high-performance lights turn night into day and bathe the

## PRESS RELEASE

terrain in front of the off-roader in brilliant light. Furthermore, this equally elegant and functional accessory routes the airflow over the roof rack, which spans the entire roof. To make it easier to load and unload the huge luggage carrier, which features integral mounting brackets for an axe and a spade, the BRABUS equipment also includes a rear-mounted ladder.

Due to the extremely tall step-in height of the cabin, BRABUS offers custom retractable steps that make it easier and safer to get in and out of the off-roader. For easier access to the rear bench seat, BRABUS developed special door hinges that increase the opening angle of the rear doors to 90 degrees.

The rear view is characterized by the distinctive BRABUS rear fascia with integral carbon skid plate, and the spare wheel cover, which is likewise made from carbon fiber. Carbon with high-gloss sealed finish on all door handles and on the rub strips on the sides of the five-door car complete the thrilling looks of this extreme off-roader.

The four-liter, twin-turbo, eight-cylinder engine of the Mercedes-AMG G 63 4x4<sup>2</sup> undergoes an extensive vitalization treatment at BRABUS as well. It increases peak power by 158 kW / 215 hp (212 bhp) and bumps peak torque by 140 Nm (103 lb-ft). The BRABUS B40S-**800** PowerXtra performance upgrade consists of two high-performance turbos with larger compressor unit and special core assembly with reinforced axial bearing. They produce a maximum boost pressure of 1.6 bar. The fitting complement is the plug-and-play BRABUS PowerXtra auxiliary control unit, which is adapted to the electronic engine management system and supplies optimized maps for injection and ignition while modifying the electronic boost pressure control. Two BRABUS BoostXtra valves produce a thrilling blow-off noise when the driver lifts off the gas.

The result of these modifications more than lives up to the spectacular appearance of the **BRABUS 800 4x4<sup>2</sup> STEALTH GREEN**: The peak power of 588 kW / 800 hp (789 bhp) at 6,600 rpm and the massive torque of 1,000 Nm (737 lb-ft), which is already on tap at a low 3,600 rpm, harmonize perfectly with the automatic transmission. If desired, its nine speeds can also be shifted manually with the ergonomic BRABUS carbon paddle shifters on the steering wheel.

Propelled by BRABUS B40S-**800** PowerXtra engine tuning, the supercar sprints from rest to 100 km/h (62 mph) in just 4.6 seconds. The top speed is electronically limited to 210 km/h (130 mph) due to the high center of gravity and the all-terrain tires.

# BRABUS

## PRESS RELEASE

It goes without saying that this performance enhancement like all BRABUS components is backed by the exemplary three-year or 100,000-km/62,000-mile BRABUS Tuning Warranty (see BRABUS Warranty terms and Conditions, updated July 2013). BRABUS exclusively uses the hi-tech lubricants from technology partner Motul also for this supercar.

Sound, performance and longevity are the outstanding traits of the BRABUS stainless sports exhaust system with actively controlled valves. Depending on the selected driving mode, the V8 whispers softly in “Coming Home” mode or mesmerizes with a markedly powerful exhaust note in “Sport” position. The BRABUS exhaust system with two chrome-plated side pipes exiting in front of the rear wheels is also a visual treat, especially at night: Each of the exposed-carbon surrounds of the exhaust pipes integrates a red ROCKET Launch Ambience Light.

To provide contrast to the STEALTH GREEN paintwork, the supercar presented here was fitted in the company upholstery shop with a particularly exclusive BRABUS MASTERPIECE interior crafted with consummate workmanship. The color “BRABUS Sunrise” was chosen for the especially soft and breathable leather and the headliner made from Dinamica microfiber. The leather on the center sections of the seats and most other leather-trimmed surfaces including the exquisite floor mats features square white quilting and perforations applied with pinpoint precision. Black piping was integrated in various places to add contrast. The “Heritage” brand-pattern labeling with embossed “77” logos on the seat side bolsters, the sides of the center console, and the visors commemorate the year 1977 when BRABUS was founded.

The BRABUS interior designers add decidedly sporty touches with precise-fit carbon elements, which were given a high-gloss sealed surface finish, and sporty aluminum components such as pedals and door lock pins.

The **BRABUS 800 4x4<sup>2</sup> STEALTH GREEN** in the specification shown here sells for 718,500 euro (export price in Germany excluding statutory VAT).

### Fuel economy, CO<sub>2</sub> emissions and emission information:

**BRABUS 800 4x4<sup>2</sup> STEALTH GREEN** based on the Mercedes-AMG G 63 4x4<sup>2</sup>: Combined fuel consumption: 20.1 l/100 km (11.7 mpg); combined CO<sub>2</sub> emissions: 456 g/km.

## PRESS RELEASE

Anyone who wants to have maximum driving fun in an exclusive ambience not only in terrain but also on the waters will find the perfect companion in the super boat likewise painted Stealth Green. The **BRABUS Shadow 900 STEALTH GREEN Signature Edition** was created in cooperation with Finnish Axopar Shipyard, which specializes in the design and construction of high-performance sports boats.

As the name indicates, the 38ft (11.6-meter) sport boat from BRABUS Marine has 900 horsepower thanks to its two Mercury Marine 450R 4.6-liter V8 four-stroke outboard motors, which give it a top speed in excess of 60 knots (111 km/h or 69 mph).

The distinctive appearance of the **BRABUS Shadow 900 STEALTH GREEN Signature Edition** is characterized by the Stealth Green paint finish, which is complemented purposefully with black signature style graphics applications and exposed-carbon elements with matt coating. The cappuccino-colored cushions created in the BRABUS upholstery shop are made from skin-friendly and water-repellent TechFX fabric, and were quilted with utmost accuracy. This color combination makes the high-end boat an unmistakable eye-catcher. One that not only looks spectacular, but also delivers in terms of recreational value. Thanks to its open design, the people on board enjoy pure, unadulterated driving fun, while its comfortable sitting and reclining surfaces offer plenty of possibilities for exciting or relaxing times on the waters.

The exhilarating performance of the **BRABUS Shadow 900 STEALTH GREEN Signature Edition** is controlled from the cockpit, which is inspired by the design of the BRABUS MASTERPIECE supercars. All elements of the boat's clearly arranged and ergonomic instrument panel are in immediate reach and easy to operate. Most controls can be operated with one's fingertips. The sure-grip multifunction steering wheel, illuminated switches and the use of touchscreen technology make the cockpit one of the most futuristic ones the boat market has to offer.

The instrument panel includes a dual, touch-sensitive Full-HD information display from Simrad that offers maximum image detail and unrivalled functionality. It has a newly developed BRABUS user interface with a digital variant of the Panerai BRABUS watch, shock monitoring, navigation system, motor management, entertainment system, and driving assistance functions.

It enables the driver of a **BRABUS Shadow 900 STEALTH GREEN Signature Edition** to steer the boat easily and precisely. An enhanced navigation system with even more functions

# BRABUS

## PRESS RELEASE

is optionally available. It includes two more nine-inch screens, on-board connectivity with 5G WLAN mobile router, a two-way radio unit with AIS receiver, a Halo20+ radar, a five-inch touchscreen with digital lighting control for the front lounge, and a BRABUS strongbox.

Further optional features for having an unforgettable time on the boat also are available. The multi-purpose storage space package is ideal for water sports enthusiasts wishing for a boat that can accommodate all their recreational equipment.

The variant that comprises a spacious aft cabin with a double-bed berth in addition to the front lounge is ideal for all those seeking for even more space and luxurious comfort. Owners who love entertainment can opt for an infotainment system that includes a 42-inch TV with Apple TV streaming service.

The **BRABUS Shadow 900 STEALTH GREEN Signature Edition** is equipped with impressive features in order to ensure that experienced captains as well as newcomers can explore the waters without problems. The shock sensor helps skippers to navigate safely in rough weather, while the system from 1st Mate delivers important safety warnings such as weather reports, and provides valuable functions like 'man overboard' monitoring, maritime distress call system and anti-theft system.

## Panerai Submersible S BRABUS Verde Militare Edition

Since 2022, the tradition-rich watch brand Panerai, which combines the ultimate in the Swiss art of watchmaking with discerning Italian design, and BRABUS, the world-famous brand for luxury mobility based in the Ruhr Valley, have been jointly developing unique timepieces. The latest "offspring" of this partnership is a wristwatch in stealth green as the perfect complement to the **BRABUS 800 4x4<sup>2</sup> STEALTH GREEN** supercar and the **BRABUS Shadow 900 STEALTH GREEN Signature Edition** super boat.

The **Panerai Submersible S BRABUS Verde Militare Edition** shares a number of key features with other models of this renowned watch manufacturer and fascinates with the use of new, innovative materials and an entirely new design style.

The watch is limited to an edition of just 200 timepieces. It has a Carbotech case with a diameter of 47 millimeters (1.8 in). Panerai was the first to use this composite material in

# BRABUS

## PRESS RELEASE

watchmaking. Carbotech is lighter than steel or titanium, corrosion-resistant, robust, and adaptable and thus the ideal material for a watch in tough outdoor use. The navy green highlights are characteristic of this model: This color can be found on the hands, the rehaut or flange, the rubberized crown, the AM/PM indicator, as well as on the small subdial for the seconds. The BRABUS logo on the movement lever and on the loop documents the cooperation of the two renowned luxury brands.

The **Panerai Submersible S BRABUS Verde Militare Edition** has a special movement based on the P.4000 caliber. The evolution of this first automatic movement developed by the Panerai manufactory in Neuchâtel with off-center micro-rotor is the P.4001/S caliber. It has a skeletonized automatic movement with a three-day power reserve. The reserve indicator is integrated into the back of the case.

The exclusive timepiece features a rotating bezel for calculating the dive time and GMT. The one-piece, off-center oscillating weight allows winding the two spring barrels in both directions while wearing the watch. Due to its skeletonized structure, the bridges and plates were reduced to their essential elements in order to reveal the inner workings. As a result, the watch is remarkably light despite its considerable size.

The **Panerai Submersible S BRABUS Verde Militare Edition** is water-resistant to 30 bar (~ a water depth of 300 meters or nearly 1,000 feet) and comes with two watchbands, one made from rubber in Stealth Green and one made from a combination of black calfskin and rubber.
